

Neighbourhood Renewal Strategy

The Vision

By 2025 no one living within Basingstoke and Deane will be disadvantaged by where they live.

We plan to do this by working together to

- Identify communities where residents have told us that quality of life could be improved.
- Identify issues which need to be addressed across the whole borough
- Identify what is currently being done to address issues and improve quality of life
- Identify what else needs to be done
- Do it!

Who are we?

Basingstoke and Deane Local Strategic Partnership brings together a range of public services - such as councils, health services, emergency services and housing associations - as well as schools and colleges, voluntary groups and the business community. By working together towards common goals the partnership aims to make a real difference to people in the borough.

We want to work together to explore what we could do to:

- Address concerns raised by local people
- Further reduce levels of crime and disorder
- Increase household income
- Improve the environment

Within

- Buckskin ward
- Popley East and West wards
- South Ham ward
- Norden ward
- Winklebury ward
- Brighton Hill South and North wards

In addition we want to increase access to affordable homes and other services in rural areas and to reduce levels of crime and disorder across the Borough. Finally, we want to take action to make sure that everyone in Basingstoke and Deane is given the opportunity to achieve their full potential through support, education and training.

What happens next

The 'Popley Partnership' has developed its action plan and work has begun to implement it. Preparation work has begun on Buckskin and South Ham and we will soon be working with the communities in each ward to develop neighbourhood plans, which we hope to complete during 2011.
