

# How the Green Cone Works

## **Sunlight**

Provides energy source for the digestion process.

## **Removable Lid**

For easy access to digestion chamber.

## **Double-walled solar cone**

Creates a heat trap of circulating air to encourage bacteria growth.

## **Soil**

Filters out smells and prevents access by flies

## **Natural Micro-organisms and Worms**

Migrate freely in and out of the basket and break down the waste.

## **Digestion Chamber**

Aerobic conditions to reduce methane production.

## **Nutrient Rich Water**

Enters surrounding ground

**Over 90% of the waste material in your Green Cone will be absorbed as water by the soil.**
