

## Schedule 5

### Identified Facility Needs by Location

This Schedule draws together a comprehensive list of all sport and recreation facilities across the borough of which the council is currently aware. The assessment highlights the quality of existing facilities and identifies any evidence of need that will form part of the evidence to justify priorities for future provision.

The Schedule is presented in three sections in accordance with the facility hierarchy (as described in Schedule 3):

- **Facilities of borough wide and sub regional significance**
- **Facilities of district significance in strategic locations**
- **Local / neighbourhood provision**

The Quality of facilities has been categorised using an industry standard definition. All facilities will be assessed under the following criteria:

**A: Good** – Performing as intended and operating efficiently

**B: Satisfactory** – Performing as intended but showing minor deterioration

**C: Poor** – Showing major defects and/or not operating as intended

**D: Bad** – Life expired and/or serious risk of imminent failure

The aspiration or need is assessed in accordance with the strategic priorities of the Plan:

- To retain and maintain existing facilities which are highly valued by the community
- To improve the quality and capacity of existing facilities that are highly valued by the community
- Where there is evidence of need that cannot be met by existing provision, to enable the development of new provision

The various sources of evidence of need are also highlighted.

This Schedule is work in progress and all sport and recreation facility providers are encouraged to submit information to ensure the Schedule is accurate and kept up to date.

**Strategic Provision:**

**Schedule 5: Draft Summary of sport and recreation facilities, by location, for consideration in the Sports Plan**

Draft Strategic / Borough wide facilities: The high standard and capacity of facilities attract people from throughout the borough and further afield.

Facility Summary					Sources of Evidence
